

Retail Sales Data Analysis Report

Objective:

The goal of this project is to analyze retail sales data and extract meaningful insights.

Tools Used:

- Python
- Pandas
- Matplotlib
- Streamlit

Data Cleaning:

- Removed missing values
- Converted date column into datetime format

Key Insights:

- Total Sales: Example Value
- Average Sales: Example Value
- Top Region: Example Value
- Top Product: Example Value

Conclusion:

This analysis helps identify top-performing regions and products for better business decisions.
